LGC | DR EHRENSTORFER™

REFERENCE MATERIAL CERTIFICATE ISO 17034

Reference Material

This certificate is designed in accordance with ISO 17034 and ISO Guide 31. This reference material (RM) was designed, produced and verified in accordance with ISO/IEC 17025, ISO 17034 and a registered quality management system ISO 9001.

Product Name
Chloroparaffin C10-C13, 63% Cl 100 µg/mL in Cyclohexane

Product Code
DRE-X23106300CY

Lot Number
G1230987CY

CAS No.
85535-84-8

Format
Solution

Mol. Weight

Expiry Date
11 Jan 2028

Mol. Formula

Storage Temp
20°C ± 4°C

CERTIFIED	CERTIFIED
Concentration 99.90 µg/mL	Expanded Uncertainty (U) 8.00 µg/mL

Uncertainty
The certified value(s) and uncertainty(ies) are determined in accordance with ISO 17034 with an 95% confidence level (k=2). Uncertainty is based on the Total Combined Uncertainty, including uncertainties of preparation, purity of neat materials, homogeneity and stability testing. Stability values are based on real evidence opposed to simulation.

The producer certifies that this reference material meets the specification stated in this certificate until the expiry date, provided it is stored unopened at the recommended temperature herein. Product warranties for this reference material are set out in the terms and conditions of purchase.

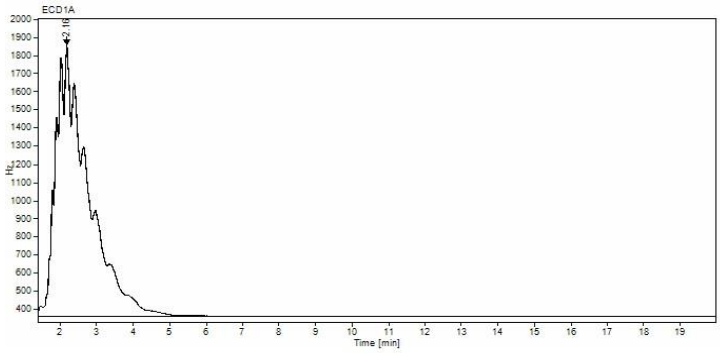
CHROMATOGRAM



Signal:	ECD1A				
Nr.	RT [min]	Area [Hz*s]	Height [Hz]	Area%	Width [min]
1	2.16	92252.62978	1493.63	100	0.725

Instrument
GC/ECD

Detection
ECD

Column
Optima-5MS, 0.25 µm, 0.25 mm

Method Details
Initial Temp: 320°C / 20 min, End Temp: 320°C, Gradient: 0°C/min

Inj.-Vol.
1.0 µL

Flow
1 mL/min

Method of Preparation
The certified value is based on gravimetric and volumetric preparation of this RM. This RM has been confirmed by the appropriate analytical techniques.

Batch Information
Solvent: Cyclohexane, Lot No. 012022CR2, 2000.00 mL.
Mixture of Congeners.

Gravimetric Data

Compound Name	Lot No.	Weight (mg)	Purity (%)
Chloroparaffin C10-C13, 63% Cl *	170504	199.997	99.9

*mixture of congeners -- See Batch information

Intended Use
This RM is intended for use in a laboratory as a calibration and quality control standard or in method development for analytical techniques.

Safety
Proper precautions should be observed while handling. See Safety Data Sheet.

Traceability
The balances used for gravimetric measurements are calibrated with weights traceable to the national standards (DKD). The calibration of the balances is verified daily internally and annually by an external accredited calibration service. Chromatographic methods are traceable to the International System of Units (SI).

Homogeneity
Random replicate samples of the final packaged RM have been analysed to prove homogeneity compliant with ISO 17034.

Storage
The RM should be stored in the original sealed container at the indicated temperature.

Instructions for use
The RM should be used shortly after opening to avoid concentration changes due to evaporation. It is recommended to use 1 mL as the minimum sample size and if less material is used, to increase the certified uncertainty by a factor of two for half sample and four for a quarter of sample. If storage after opening is necessary, the RM should be tightly closed and kept from light and moisture. If the RM was in a sealed ampoule, it should be transferred to a vial with minimum head space.
